

RAVI PRAKASH

Senior Java Full-Stack Developer | Spring Boot & Microservices | REST APIs | React

India • +91-8507661455 • coolraviprakash156@gmail.com • linkedin.com/in/ravi-prakash-422374152

PROFESSIONAL SUMMARY

Senior Java Full-Stack Developer with 6+ years of hands-on experience designing and delivering enterprise-grade backend services and microservices using Java (8/11/17/21), Spring Boot, Spring MVC, and RESTful APIs. Progressed from Intern to Consultant within Liferay, Inc. — consistently promoted for technical depth, clean code standards, and client ownership. Proven track record of building scalable microservices, payment gateway integrations, event-driven pipelines, and high-traffic production systems across BFSI, FMCG, telecom, logistics, manufacturing, and government domains. Proficient in Git, Maven, and Agile/Scrum delivery. Also brings deep expertise on the Liferay DXP 7.4+ platform — Objects, Workflows, Client Extensions, Headless APIs — for organizations in the digital experience space.

CORE SKILLS

Languages: Java 8 / 11 / 17 / 21, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring MVC, jQuery

Architecture: Microservices, RESTful APIs, Event-Driven Architecture, Payment Gateway Integration, Headless CMS, SOAP, JSON, XML

Databases: MySQL, Oracle DB, PostgreSQL

Tools & DevOps: Git, GitHub, Maven, Gradle, IntelliJ IDEA, Eclipse, Postman, Swagger, JIRA, Apache Tomcat, JBoss / WildFly, Linux

Methodologies: Agile / Scrum, Code Reviews, TDD, Sprint Planning

Liferay DXP: Liferay DXP 7.2 / 7.4+, Objects, Object Actions, Client Extensions, OSGi Modules, Service Builder, Headless APIs

PROFESSIONAL EXPERIENCE

Consultant — Liferay, Inc.

2023 – Present

Promoted for consistent delivery, technical depth, and stakeholder ownership

- Design and develop Java + Spring Boot microservices and RESTful APIs for enterprise clients across BFSI, FMCG, logistics, telecom, manufacturing, and government sectors — owning architecture, implementation, and production rollout.
- Build scalable backend services covering business logic, third-party REST & SOAP integrations, secure data flows, event-driven processing, and payment gateway implementations using Spring Boot and Spring MVC.
- Architected a Digital Customer Onboarding system enabling 100% automated user registration without manual intervention.
- Built backend integrations for 4 third-party APIs (Salesforce, eKYC, Paytm, BMRS) with React UI serving 10,000+ customers.
- Engage directly with high-profile stakeholders including PMO offices and Government of Brunei representatives — gathering requirements, translating them into technical solutions, and presenting deliverables.
- Design portal-side customizations on Liferay DXP 7.4+ using Objects, Object Actions, Client Extensions, and Headless APIs; build React.js front-end components consuming RESTful APIs.

Associate Consultant — Liferay, Inc.

2021 – 2023

Promoted from intern role for strong technical performance and ownership

- Developed and integrated Java + Spring Boot microservices for business logic, third-party API integrations (REST & SOAP), and scalable backend processing; upgraded legacy components from Java 8/11 to Java 17/21 LTS.
- Built RESTful APIs and service layers using Spring Boot and Spring MVC; contributed to Agile sprints, sprint planning, and client demos while enforcing coding standards through code reviews.

Intern — Liferay, Inc.

2020 – 2021

Trained on Java, Spring MVC, and Liferay DXP; earned full-time offer on completion.

- Built a POC integrating an external Oracle database with table display and expandable detail views for enhanced data visualisation.

- Created a custom Liferay gradebook module with assignment creation, grade entry, and student performance tracking features that streamlined instructor workflows and improved data accessibility.

KEY PROJECTS

Panasonic — B2B Enterprise Portal & Payment Platform

- **Tech Stack:** Java 17, Spring Boot, OSGi, REST APIs, Oracle DB, Liferay DXP 7.4
- Designed and delivered end-to-end Payment Gateway Integration — Spring Boot microservices for secure transaction flows, dealer payment processing, idempotent request handling, webhook security, and daily reconciliation, enabling online B2B commerce at scale.
- Built a comprehensive User Dashboard from the ground up — Spring Boot REST APIs backing product catalog, order history, dealer activity, and role-based content views — alongside multiple custom backend modules for product browsing, dealer access, and regional customization.

ETDS — Income Tax Department (Event-Driven Microservices)

- **Tech Stack:** Java 21, Spring Boot, Liferay DXP 7.4+, Objects, Object Actions, Client Extensions, React.js, PostgreSQL
- Architected and built an event-driven newsletter subscription pipeline for citizen-facing TDS communications — Liferay Objects for subscriber data modelling, Object Actions triggering downstream Spring Boot microservices on subscribe / unsubscribe events.
- Developed Spring Boot microservices for subscription processing — notification dispatch, audit logging, and email delivery; built a React.js Client Extension (Custom Element) for the subscribe/unsubscribe UX consuming Liferay Headless APIs.

Blue Dart — Logistics Portal (High-Traffic Production System)

- **Tech Stack:** Java 8 / 11, Spring Boot, REST APIs, MySQL, Liferay DXP 7.4
- Engineered backend services and APIs for a high-traffic logistics portal handling peak-load concurrent traffic for shipment tracking and account management — tuned JVM, GC strategy, caching, DB indexes, and query layers to maintain stable P95 response times under load.
- Built real-time third-party API integrations for live shipment tracking; delivered query batching, caching strategies, and connection pool tuning.

Vodafone Idea (VIL) — Telecom Customer Self-Service Portal

- Java, Spring Boot, REST APIs, MySQL, Liferay DXP — developed complex backend logic for telecom billing, plan management, account/profile management, and coupon flows; integrated with external billing and CRM systems through REST APIs for real-time customer data and transactions.

Edelweiss Financial Services — Insurance Customer Portal

- **Tech Stack:** Java 11, Spring MVC, REST APIs, JavaScript, jQuery, MySQL, Liferay DXP 7.4
- Built Spring MVC service layers and REST API integrations with third-party financial systems for a multi-product insurance portal (term, health, ULIP, motor); developed interactive premium calculators using JavaScript and jQuery with dynamic conditional flows.

JCB — Job Portal (similar to Naukri.com)

- **Tech Stack:** Java, Service Builder, REST APIs, MySQL, Liferay DXP 7.2
- Engaged directly with high-profile clients — PMO offices and Government of Brunei stakeholders — for requirements gathering and delivery; built end-to-end job posting, candidate registration, advanced search, and application tracking backend using Java and Service Builder on MySQL.

Pidilite Industries — Dealer & Distribution Portal

- Java 11, Spring MVC, REST APIs, MySQL, Liferay DXP 7.4 — built Java + Spring MVC backend modules for order tracking, loyalty management, and product information access through service layer optimizations and REST API integrations.

EDUCATION & CERTIFICATIONS

GIET University, Gunupur — B.Tech, Computer Science & Engineering 2016 – 2020

Kendriya Vidyalaya, Danapur Cantt, Patna — Higher Secondary (12th, CBSE), 72% 2015

Kendriya Vidyalaya, Danapur Cantt, Patna — Secondary (10th, CBSE), 9.4 CGPA 2013

Certifications: Liferay 7.4 Application / Back-End / Front-End Developer; Liferay Certified Professional Developer; BEWL
